Name: _____

Roll No: _____

For each chart below, answer: What is it trying to tell you? Do you trust it? Why or why not?

Regional Comparison - Q2 2025

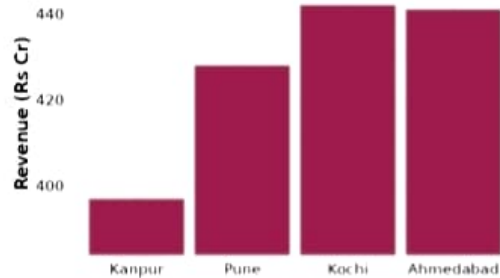

Chart 1

Market Share by Product (10 categories)

Chart 2

Chocolate Consumption vs. Nobel Prizes Won

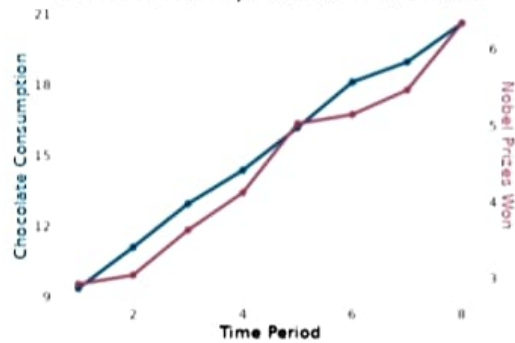

Chart 3

Coffee Cups/Day vs. Typing Speed (WPM)

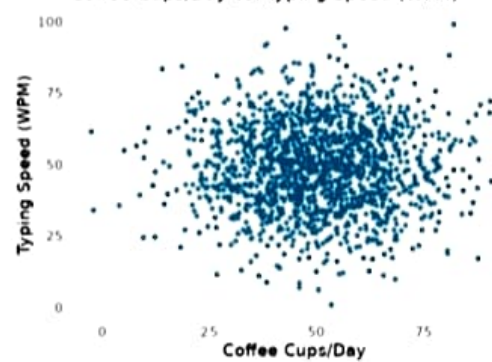

Chart 4

Your notes:

01/10/2026

ACTIVITY-1

Decode the chart

Name: Ayesha Siddiga.S

Roll No: 04

chart 1: Regional comparison.

What is it trying to tell you?

The chart compares the revenue of four regions: Kanpur, Pune, Kochi and Ahmedabad.

Kochi has the highest revenue, followed closely by Ahmedabad, Pune, while Kanpur has the lowest revenue.

Do you trust it? Why?

Yes mostly.

The difference between regions is relatively small, so the truncated-looking vertical scale could make the difference appear larger than they actually are.

chart 2: Market share

What is it trying to tell you?

The pie chart shows how the total market share is divided among 10 different products.

Do you trust it? Why?

partly. A pie chart is suitable for showing market share but labels are not shown clearly.

chart 3: Chocolate consumption vs Nobel Prizes won

What is it trying to tell you?

It suggests that as chocolate consumption increases, the number of Nobel prizes won also tends to increase.

Do you trust it? Why?

Not completely. The chart shows a relationship between two variables, but co-relation does not mean causation.

chart 4: Coffee cups/Day vs Typing speed

What is it trying to tell you?

It shows the relationship between the number of coffee cups consumed per day and typing speed. The points are widely scattered, do not show a strong clear relationship.

Do you trust it? Why?

Yes, but with caution. The scatter plot is appropriate for showing the relationship between two numerical variables.
